Profile

Computer Systems Engineer with vocation and with great passion for software development.

I like to be useful and I enjoy a lot learning new things, i'm currently looking for an opportunity to continue my career.

Experience

I have worked for 11 months at Centro de Investigación y Desarrollo de Tecnologías de la Información. I have been working with Javascript Language using React,js in some projects involving fetching api's, tyling the data responses and creating the back-end aswell, using Node,js.

Education

08/2014—08/2019	**Instituto Tecnológico de Tepic (ITT).**
	Computer Systems Engineering
	With specialty in web and mobile development.

Technical Skills

Programming Languages	**Javascript**, Python, Java, Ruby.
Frameworks/Tools	**React.js**, Angular v2+, Express.js, **Node.js**, Typescript, Rails.
DBMS	**Mongodb**, MS SQLServer , MySql, Postgresql.

Tasks Achieved

Developed web and mobile applications in different languages.

Granted quality in software development by using best practices and code standards.

Good understanding of the MVC model, resulting in quality software.

Creation and management for Databases.

Implemented versión control system using **Git.**

I have worked with agile methologies like **Scrum.**
